

Western Mining Shovels

Round Point and Long Handle

Stiff Point, Half Spring or Full Spring Blade

No. 2 size 9½x12, Weight 56 lbs. to Dozen.

High carbon crucible analysis polished steel blades with best Northern Ash handles, sanded and waxed. Bullock Brand. Dozen.....\$15.48

Half spring shovels always furnished unless otherwise specified.

Irrigating Shovels with Step

The quality of our Plain Back Irrigating Shovels is exactly the same as the Plain Back Western Mining Shovels. They are however, made with steel steps on blade of the same gauge as used in the blade, securely riveted on with three rivets. Blades are full polished. Handles, selected Northern Ash, medium lift.

Bullock Brand, weight per dozen 64 lbs. Dozen. \$16.01
Monongah Featherweight, 53 lbs. per dozen. Doz. 16.01

Coal and Coke Shovels

Baldwins Pinnacle
Three Rib Hollow
Back, Wood "D" or
Straight Handles

Long Handle No. 2 Size
in Stock

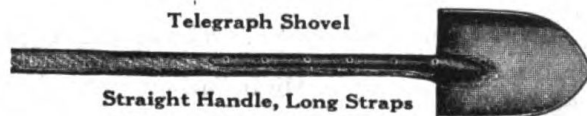

The shape of blade is exactly right to meet the approval of a large majority of our customers. The bowl is deep; frog is long and high, giving great capacity and extra stiffness, support and strength, preventing any buckling of blades. Bent in socket gives the proper lift and balance and brings "D" end of handle in the right place (just above knee) when in a shoveling position.

No. 4X is also used by many for snow, cinders and light loose materials.

"Baldwin" Moulders' Shovels

With Regular or
Split Wood "D" Handle
Polished Blades only

Special attention is called to our Moulders' Shovels. They are made of very high quality steel, and the perfect polish on both back and face of blade permits them to "clean" or shed the sand easily and quickly. The blade and handle are perfectly aligned and the lift is designed to make them accurately balanced. Size of blade 10x12 inches. Furnished with either regular wood "D" or split "D" handle.

Eastern
Narrow Mouth**"Baldwin" Scoops****Hollow-Back Style with Northern White Ash Handles**

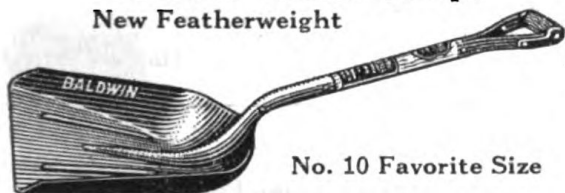

These scoops are all furnished with new high bend, tapered and polished sockets giving a fine hand-hold or grip and better hang or balance.

The top of the bowl is bent over at the socket—reinforcing and stiffening the bowl at this point—the frog extends farther into the center of the bowl which adds strength and stiffness without adding greater weight.

Pinnacle Scoops—Have wood "D" handles, are black finished and heat treated.

Knoxall Scoops—Have split "D" handles and full polished blades.
